Diverse Downtowns

75 of the region’s downtowns were analyzed, and each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted.

This effort found that more diverse downtowns were generally less impacted by the economic shutdown related to the COVID-19 pandemic.

All 75 of the downtowns that were analyzed are listed, along with their Pandemic Impact Scores, in order from most to least diverse.

Disclaimer: This is an analysis of visits to and trade areas of the region’s downtowns. However, it is not an economic impact analysis. Retail sales were not part of this body of work.
Characteristics that reduced the pandemic’s impact:

Downtowns with the following characteristics were generally less impacted by the pandemic than their peers.

<table>
<thead>
<tr>
<th>Development</th>
<th>Diversity</th>
<th>People</th>
<th>Trails</th>
<th>Walkability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Recent mixed-use, residential, and retail developments within the downtowns increased diversity as well as resiliency.</td>
<td>Downtowns with diverse built environments, demographics, local economies, mix of uses, and transportation options, were less impacted.</td>
<td>Diverse and permanent residential populations located within the downtowns provided retailers with customers even as people stayed close to home.</td>
<td>Existing Circuit Trails connected downtowns with open space and enabled alternative modes of transportation.</td>
<td>Historic downtowns with more pedestrian-friendly built environments had greater resiliency.</td>
</tr>
</tbody>
</table>
Characteristics that exacerbated the pandemic’s impact:

Downtowns that lacked the characteristics found to reduce the pandemic’s impact, or that were more greatly defined by the following characteristics, were generally more impacted by the pandemic than their peers.

**Cars**
Auto-oriented downtowns with lower Walk Scores and more cars per household were more impacted by the pandemic.

**Colleges**
Downtowns that are overly-reliant on these anchor institutions were less resilient during the pandemic.

**Goods & Services**
As the share of Neighborhood Goods & Services (NGS) retailers increased in a downtown, so did the pandemic’s impact.

**Transit**
The pandemic significantly reduced transit ridership, and this impact had a ripple effect in transit-oriented downtowns.

**Vacancy**
The pandemic had a greater impact as downtown vacancy rates increased.
Diverse Downtowns | Doylestown Borough, PA

For the 75 downtowns analyzed, each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted. The more diverse downtowns were generally less impacted by the pandemic.

Doylestown's downtown is one of the most walkable downtowns in the region, with one of the largest residential populations. It also has a healthy mix of civic, cultural, and offices uses. However, there is an under-representation of Neighborhood Goods & Services (NGS) retailers. These characteristics are why the downtown's Diversity Score of 40 is better than average for the region.

Although NGS retailers are under-represented in Doylestown, this quality in addition to the downtown's overall diversity most likely helped mitigate the impacts of the pandemic. As a result, Doylestown's Pandemic Impact Score of 29 was the fourth lowest.
Downtown Typologies

Nine downtown typologies were identified and the average Pandemic Impact Score was determined for each: Brewery (45), Circuit (48), Classic (46), College (50), Core (43), Expanding (42), Historic (47), Opportunity (45), and Transit-Oriented (50).

In general, more typologies equated to a lower Pandemic Impact Score. Doylestown is considered to be four typologies: Brewery, Classic, Historic, and Transit-Oriented. Downtowns that are considered to be four typologies had an average Pandemic Impact Score of 44.

Doylestown’s diversity, retail mix, and large residential population most likely offset impacts observed in the other Transit-Oriented downtowns, which were some of the most impacted.
A negative correlation between the estimated population of the region’s downtowns and the Pandemic Impact Score was identified. In other words, the larger the downtown population, the smaller the impact.

In 2019, Doylestown’s downtown population was estimated to be 503, compared to the average of 165 for all downtowns, and 326 for the least impacted downtowns. This may partially explain why it was one of the 10 least impacted downtowns.

The presence of a permanent residential population most likely mitigated some of the impacts related to SEPTA ridership and helped reduce the impact observed in other Transit-Oriented downtowns.

**SOURCE:** BUXTON CO.
Retail accounts for 69% of the uses in Doylestown’s downtown, the average was 57% for all downtowns and 60% for the least impacted downtowns.

In the least impacted downtowns, Food & Beverage (FB) makes up a slightly smaller share of retail uses at 30%, while General Merchandise, Apparel, Furnishings & Other (GAFO) is nearly equal at 38%. On average as the share of each of these increased, the Pandemic Impact Score decreased.

Conversely, the analysis found that as the share of Neighborhood Goods & Services (NGS) retailers increased so did the Pandemic Impact Score. In the least impacted downtowns, NGS retailers made up 30% of all retail, which is more than in Doylestown.

Of note, Doylestown was one of only three downtowns to have both Experiential and Hospitality uses. Additionally, the Residential count may not capture all units that exist above groundfloor retail.
Visits to Downtown

Geolocated, deidentified cellphone location data was analyzed to determine the pandemic’s impact on visits to the region’s downtowns and their trade areas. Visits to Doylestown were as follows:

- **Pre-Pandemic**
  - Delaware: 0.1%
  - Maryland: 0.0%
  - New Jersey: 6.2%
  - New York: 0.0%
  - Pennsylvania: 93.7%

- **Shutdown | March 13 - June 15, 2020**
  - Delaware: 0.0%
  - Maryland: 0.0%
  - New Jersey: 1.3%
  - New York: 0.0%
  - Pennsylvania: 98.7%

- **Reopening | June 16 - October 31, 2020**
  - Delaware: 0.0%
  - Maryland: 0.0%
  - New Jersey: 2.2%
  - New York: 0.0%
  - Pennsylvania: 97.8%
Pre-pandemic, visitors to Doylestown were primarily from Bucks, Montgomery, and Philadelphia Counties, as well as from beyond the region. However, during the pandemic, the majority of visits came from within Bucks County.

Between August 2018 and March 2020, 16,819 people visited the downtown. This was nearly twice the average of 8,800 for all of the downtowns.

During the shutdown (March 13 - June 15) there were 745 visits, and during the reopening period (June 16 - October 31) there were 1,640 visits to Doylestown's downtown.
During the economic shutdown, there were 745 visits to Doylestown compared to 4,731 visits during the same period in 2019. This equated to an 84% reduction.

The average number of visits during the shutdown period was 439 compared to 2,450 visits during the same period in 2019, which equated to an average reduction of 81%.

Gloucester City’s downtown had the smallest reduction in visits at 66%, and the average for the least impacted downtowns was 81%.

Reopening Rebound
June 16 - October 31, 2020

Visits to Doylestown’s downtown increased by 120% during the reopening period to a total of 1,640 visits. This was 73% fewer than the 6,167 visits that occurred during the same period in 2019.

On average, visits increased by 62% for all downtowns, to approximately 700 visits, and by 91% for the least impacted downtowns, to approximately 1,700 visits.

New Hope observed the greatest increase at 215%, with more than 2,800 visits during that time.

SOURCE: BUXTON CO.
Doylestown’s pre-pandemic trade area was a 38 minute drive time, which shrank by 18% during the shutdown to 31 minutes. During reopening, the trade area recovered by 5% to 33 minutes.

The average pre-pandemic trade area was 31 minutes, with a 23% reduction during the shutdown down to 24 minutes. The average recovery was 10% up to 27 minutes.

At 69 minutes, New Hope was the only downtown with a trade area that extended beyond an hour. It was also the only downtown to have a larger trade area during reopening (72 minutes) than it did pre-pandemic.
