Diverse Downtowns

75 of the region’s downtowns were analyzed, and each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted.

This effort found that more diverse downtowns were generally less impacted by the economic shutdown related to the COVID-19 pandemic.

All 75 of the downtowns that were analyzed are listed, along with their Pandemic Impact Scores, in order from most to least diverse.

Disclaimer:
This is an analysis of visits to and trade areas of the region’s downtowns. However, it is not an economic impact analysis. Retail sales were not part of this body of work.
Characteristics that *reduced* the pandemic’s impact:

Downtowns with the following characteristics were generally less impacted by the pandemic than their peers.

<table>
<thead>
<tr>
<th>Development</th>
<th>Diversity</th>
<th>People</th>
<th>Trails</th>
<th>Walkability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Recent mixed-use, residential, and retail developments within the downtowns increased diversity as well as resiliency.</td>
<td>Downtowns with diverse built environments, demographics, local economies, mix of uses, and transportation options, were less impacted.</td>
<td>Diverse and permanent residential populations located within the downtowns provided retailers with customers even as people stayed close to home.</td>
<td>Existing Circuit Trails connected downtowns with open space and enabled alternative modes of transportation.</td>
<td>Historic downtowns with more pedestrian-friendly built environments had greater resiliency.</td>
</tr>
</tbody>
</table>
### Characteristics that **exacerbated** the pandemic’s impact:

Downtowns that lacked the characteristics found to reduce the pandemic’s impact, or that were more greatly defined by the following characteristics, were generally more impacted by the pandemic than their peers.

<table>
<thead>
<tr>
<th>Cars</th>
<th>Colleges</th>
<th>Goods &amp; Services</th>
<th>Transit</th>
<th>Vacancy</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto-oriented downtowns with lower Walk Scores and more cars per household were more impacted by the pandemic.</td>
<td>Downtowns that are overly-reliant on these anchor institutions were less resilient during the pandemic.</td>
<td>As the share of Neighborhood Goods &amp; Services (NGS) retailers increased in a downtown, so did the pandemic’s impact.</td>
<td>The pandemic significantly reduced transit ridership, and this impact had a ripple effect in transit-oriented downtowns.</td>
<td>The pandemic had a greater impact as downtown vacancy rates increased.</td>
</tr>
</tbody>
</table>
Diverse Downtowns | Jenkintown Borough, PA

For the 75 downtowns analyzed, each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted. The more diverse downtowns were generally less impacted by the pandemic.

Jenkintown’s downtown scores 63 with regards to diversity, which makes it one of the least diverse downtowns in the region. Despite having a relatively walkable built environment, the downtown lacks a significant residential population or civic uses, and retail makes up a larger share of uses than most downtowns.

Although the downtown lacks the diversity observed in the least impacted downtowns, the overall impact of the pandemic was average for Jenkintown with a Pandemic Impact Score of 52. These findings suggest that efforts to improve Jenkintown’s diversity may help fortify what is already a relatively resilient downtown.
Downtown Typologies

Nine downtown typologies were identified and the average Pandemic Impact Score was determined for each: Brewery (45), Circuit (48), Classic (46), College (50), Core (43), Expanding (42), Historic (47), Opportunity (45), and Transit-Oriented (50).

In general, more typologies equated to a lower Pandemic Impact Score. Jenkintown is considered to be two typologies: Brewery and Classic.

Downtowns that are considered to be two typologies had an average Pandemic Impact Score of 52 which is equal to Jenkintown’s score as well. The most typologies for any one downtown was six, with an average Pandemic Impact Score of 42.
A negative correlation between the estimated population of the region’s downtowns and the Pandemic Impact Score was identified. In other words, the larger the downtown population, the smaller the impact.

In 2019, Jenkintown’s downtown population was estimated to be 22, which was nearly eight times lower than the average of 165 for all downtowns and nearly 15 times less than the average of 326 for the least impacted downtowns.

SOURCE: BUXTON CO.
Retail accounts for 71% of the uses in Jenkintown’s downtown, which is higher than the average of 57% for all downtowns and slightly less than the average of 60% for the least impacted.

In the least impacted downtowns, **Food & Beverage (FB)** and **General Merchandise, Apparel, Furnishings & Other (GAFO)** retailers made up larger shares of retail on average at 30% and 38% respectively. On average as the share of each of these increased, the Pandemic Impact Score decreased.

Conversely, **Neighborhood Goods & Services (NGS)** retailers made up a smaller share on average at 30% in the least impacted downtowns.

The greater the share of NGS retail or the higher the vacancy rate, the higher the Pandemic Impact Score.
Visits to Downtown

Geolocated, deidentified cellphone location data was analyzed to determine the pandemic’s impact on visits to the region’s downtowns and their trade areas. Visits to Jenkintown were as follows:

- **Pre-Pandemic**
  - Delaware: 0.0%
  - Maryland: 0.0%
  - New Jersey: 1.8%
  - New York: 0.0%
  - Pennsylvania: 98.2%

- **Shutdown | March 13 - June 15, 2020**
  - Delaware: 0.5%
  - Maryland: 0.0%
  - New Jersey: 1.1%
  - New York: 0.0%
  - Pennsylvania: 98.9%

- **Reopening | June 16 - October 31, 2020**
  - Delaware: 0.0%
  - Maryland: 0.0%
  - New Jersey: 1.7%
  - New York: 0.0%
  - Pennsylvania: 98.3%
Pre-pandemic, visitors to Jenkintown were primarily from Bucks, Delaware, Montgomery and Philadelphia Counties. However, during the pandemic, the majority of visits came from within Montgomery and Philadelphia Counties.

Between August 2018 and March 2020, 10,662 people visited the downtown. This was more than the average of 8,800 visits for all of the downtowns.

During the shutdown (March 13 - June 15) there were 293 visits, and during the reopening period (June 16 - October 31) there were 607 visits to Jenkintown’s downtown.
During the economic shutdown, there were 293 visits to Jenkintown's downtown compared to 3,132 visits during the same period in 2019. This equated to a 91% reduction.

The average number of visits during the shutdown period was 439 compared to 2,450 visits during the same period in 2019, which equated to an average reduction of 81%.

Gloucester City's downtown had the smallest reduction in visits at 66%, and the average for the least impacted downtowns was 81%.

SOURCE: BUXTON CO.
Visits to Jenkintown’s downtown increased by 107% during the reopening period to a total of 607 visits. This was 83% fewer than the 3,661 visits that occurred during the same period in 2019.

On average, visits increased by 62% for all downtowns, to approximately 700 visits, and by 91% for the least impacted downtowns, to approximately 1,700 visits.

New Hope observed the greatest increase at 215%, with more than 2,800 visits during that time.
Jenkintown’s pre-pandemic trade area was a 35 minute drive time, which shrunk by 14% during the shutdown to 30 minutes. During reopening, the trade area recovered by 6% to 32 minutes.

The average pre-pandemic trade area was 31 minutes, with a 23% reduction during the shutdown down to 24 minutes. The average recovery was 10% for all downtowns up to 27 minutes.

At 69 minutes, New Hope was the only downtown with a trade area that extended beyond an hour. It was also the only downtown to have a larger trade area during reopening (72 minutes) than it did pre-pandemic.
