

# Weekday Truck Speeds in the DVRPC Region

## Weekday Truck Speeds on Interstate Highways

Average weekday truck speeds on interstate highways from March 2020 through May 2021 were consistently higher than 2019 due to impacts from the pandemic. Monthly speed trends in 2021 are similar to pre-pandemic trends in 2019 except with better performance, but the April and May periods are not performing as well compared to April and May 2020 when interstates experienced some of their highest speeds due to the onset of the pandemic and statewide stay-at-home orders.
