Diverse Downtowns

75 of the region’s downtowns were analyzed, and each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted.

This effort found that more diverse downtowns were generally less impacted by the economic shutdown related to the COVID-19 pandemic.

All 75 of the downtowns that were analyzed are listed, along with their Pandemic Impact Scores, in order from most to least diverse.

Disclaimer:
This is an analysis of visits to and trade areas of the region’s downtowns. However, it is not an economic impact analysis. Retail sales were not part of this body of work.
Characteristics that **reduced** the pandemic’s impact:

Downtowns with the following characteristics were generally less impacted by the pandemic than their peers.

<table>
<thead>
<tr>
<th>Development</th>
<th>Diversity</th>
<th>People</th>
<th>Trails</th>
<th>Walkability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Recent mixed-use, residential, and retail developments within the downtowns increased diversity as well as resiliency.</td>
<td>Downtowns with diverse built environments, demographics, local economies, mix of uses, and transportation options, were less impacted.</td>
<td>Diverse and permanent residential populations located within the downtowns provided retailers with customers even as people stayed close to home.</td>
<td>Existing Circuit Trails connected downtowns with open space and enabled alternative modes of transportation.</td>
<td>Historic downtowns with more pedestrian-friendly built environments had greater resiliency.</td>
</tr>
</tbody>
</table>
Characteristics that **exacerbated** the pandemic’s impact:

Downtowns that lacked the characteristics found to reduce the pandemic’s impact, or that were more greatly defined by the following characteristics, were generally more impacted by the pandemic than their peers.

**Cars**
Auto-oriented downtowns with lower Walk Scores and more cars per household were more impacted by the pandemic.

**Colleges**
Downtowns that are overly-reliant on these anchor institutions were less resilient during the pandemic.

**Goods & Services**
As the share of Neighborhood Goods & Services (NGS) retailers increased in a downtown, so did the pandemic’s impact.

**Transit**
The pandemic significantly reduced transit ridership, and this impact had a ripple effect in transit-oriented downtowns.

**Vacancy**
The pandemic had a greater impact as downtown vacancy rates increased.
Diverse Downtowns | Lansdowne Borough, PA

For the 75 downtowns analyzed, each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted. The more diverse downtowns were generally less impacted by the pandemic.

Lansdowne has a historic and walkable downtown with a number of civic, cultural, and office uses that support a healthy share of retail uses. These qualities are why the downtown received a Diversity Score of 37, which indicates that the downtown is relatively diverse when compared to the region’s other downtowns.

Despite these qualities, the pandemic had a typical impact on Lansdowne with the downtown receiving a Pandemic Impact Score of 49. Less impacted downtowns had larger residential populations, and fewer Neighborhood Goods & Services (NGS) retailers.
Nine downtown typologies were identified and the average Pandemic Impact Score was determined for each: Brewery (45), Circuit (48), Classic (46), College (50), Core (43), Expanding (42), Historic (47), Opportunity (45), and Transit-Oriented (50).

In general, more typologies equated to a lower Pandemic Impact Score. Lansdowne is considered to be five typologies: Circuit (although the trail does not currently exist), Expanding (due to the potential for infill development), Historic, Opportunity and Transit-Oriented. Downtowns that are considered to be five typologies had an average Pandemic Impact Score of 42.

Circuit downtowns without an existing trail had an average score of 53, and potentially Expanding downtowns had an average score of 46 compared to 42.
Downtown Population

A negative correlation between the estimated population of the region’s downtowns and the Pandemic Impact Score was identified. In other words, the larger the downtown population, the smaller the impact.

In 2019, Lansdowne’s downtown population was estimated to be 29, which was much less than the averages of 165 for all downtowns and 326 for the least impacted downtowns.

Although Lansdowne’s downtown population is relatively small, it is one of the most diverse with regards to demographics, with the Black, Hispanic, and White populations accounting for 52%, 3%, and 40% respectively.
Retail accounts for 56% of the uses in Lansdowne's downtown, which is nearly equal to the average of 57% for all downtowns and slightly less than the average of 60% for the least impacted downtowns.

In the least impacted downtowns, **Food & Beverage (FB)** retailers made up a nearly equal share at 30%, while **General Merchandise, Apparel, Furnishings & Other (GAFO)** retailers made up a larger share at 38%. In general, as the share of each of these increased, the Pandemic Impact Score decreased.

Conversely, **Neighborhood Goods & Services (NGS)** retailers made up a smaller share in the least impacted downtowns at 30%. On average, as the share of NGS retailers or a downtown's vacancy rate increased, so did the Pandemic Impact Score. Lansdowne has a vacancy rate of 13%, which is nearly double the average of 7.8% for the least impacted downtowns.
Visits to Downtown

Geolocated, deidentified cellphone location data was analyzed to determine the pandemic's impact on visits to the region's downtowns and their trade areas. Visits to Lansdowne were as follows:

- **Pre-Pandemic**
  - Delaware: 1.3%
  - Maryland: 0.0%
  - New Jersey: 1.8%
  - New York: 0.0%
  - Pennsylvania: 96.9%

- **Shutdown | March 13 - June 15, 2020**
  - Delaware: 0.6%
  - Maryland: 0.0%
  - New Jersey: 1.1%
  - New York: 0.0%
  - Pennsylvania: 98.3%

- **Reopening | June 16 - October 31, 2020**
  - Delaware: 1.2%
  - Maryland: 0.0%
  - New Jersey: 1.4%
  - New York: 0.0%
  - Pennsylvania: 97.4%
Pre-pandemic, visitors to Lansdowne came from Delaware, Montgomery, and Philadelphia Counties in PA, and somewhat from Camden County in NJ and the areas around Wilmington. During the pandemic, most visits came from nearby portions of Delaware County as well as Philadelphia County.

Between August 2018 and March 2020, 11,439 people visited the downtown. This was nearly 3,000 more than the average of 8,800 visits for all of the downtowns.

During the shutdown (March 13 - June 15) there were 947 visits, and during the reopening period (June 16 - October 31) there were 948 visits to Lansdowne’s downtown.
During the economic shutdown, there were 947 visits (the 4th highest number of visits observed), to Lansdowne’s downtown, compared to 3,250 visits during the same period in 2019. This equated to a 71% reduction, which was the 8th lowest reduction.

The average number of visits during the shutdown period was 439 compared to 2,450 visits during the same period in 2019, which equated to an average reduction of 81%.

Gloucester City’s downtown had the smallest reduction in visits at 66%, and the average for the least impacted downtowns was 81%.

**10 Least Impacted Downtowns**

- Lansdowne: 71%
- 52nd Street: 75%
- Bristol: 71%
- Doylestown: 84%
- Haddonfield: 84%
- Harrison (Mullica Hill): 77%
- New Hope: 85%
- Princeton: 90%
- Quakertown: 75%
- Upper Darby: 81%
- West Chester: 87%
- All Downtowns: 81%

SOURCE: BUXTON CO.
Despite having the 4th highest number of visits for any downtown, visits to Lansdowne’s downtown only increased by one visit during the reopening period to a total of 948 visits. This was 76% fewer than the 3,898 visits that occurred during the same period in 2019.

On average, visits increased by 62% for all downtowns, to approximately 700 visits, and by 91% for the least impacted downtowns, to approximately 1,700 visits.

New Hope observed the greatest increase at 215%, with more than 2,800 visits during that time.

Lansdowne’s pre-pandemic trade area was a 29 minute drive time, which shrunk by 24% during the shutdown to 22 minutes and did not recover during the reopening period.

The average pre-pandemic trade area was 31 minutes, with a 23% reduction during the shutdown down to 24 minutes. The average recovery was 10% for all downtowns up to 27 minutes.

At 69 minutes, New Hope was the only downtown with a trade area that extended beyond an hour. It was also the only downtown to have a larger trade area during reopening (72 minutes) than it did pre-pandemic.

**Trade Area Recovery**
(Drive Time in Minutes)

At 69 minutes, New Hope was the only downtown with a trade area that extended beyond an hour. It was also the only downtown to have a larger trade area during reopening (72 minutes) than it did pre-pandemic.
