Diverse Downtowns

75 of the region’s downtowns were analyzed, and each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted.

This effort found that more diverse downtowns were generally less impacted by the economic shutdown related to the COVID-19 pandemic.

All 75 of the downtowns that were analyzed are listed, along with their Pandemic Impact Scores, in order from most to least diverse.

**Disclaimer:** This is an analysis of visits to and trade areas of the region’s downtowns. However, it is not an economic impact analysis. Retail sales were not part of this body of work.

Characteristics that reduced the pandemic’s impact:

Downtowns with the following characteristics were generally less impacted by the pandemic than their peers.

**Development**
Recent mixed-use, residential, and retail developments within the downtowns increased diversity as well as resiliency.

**Diversity**
Downtowns with diverse built environments, demographics, local economies, mix of uses, and transportation options, were less impacted.

**People**
Diverse and permanent residential populations located within the downtowns provided retailers with customers even as people stayed close to home.

**Trails**
Existing Circuit Trails connected downtowns with open space and enabled alternative modes of transportation.

**Walkability**
Historic downtowns with more pedestrian-friendly built environments had greater resiliency.
Characteristics that **exacerbated** the pandemic’s impact:

Downtowns that lacked the characteristics found to reduce the pandemic’s impact, or that were more greatly defined by the following characteristics, were generally more impacted by the pandemic than their peers.

<table>
<thead>
<tr>
<th>Characteristic</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cars</td>
<td>Auto-oriented downtowns with lower Walk Scores and more cars per household were more impacted by the pandemic.</td>
</tr>
<tr>
<td>Colleges</td>
<td>Downtowns that are overly-reliant on these anchor institutions were less resilient during the pandemic.</td>
</tr>
<tr>
<td>Goods &amp; Services</td>
<td>As the share of Neighborhood Goods &amp; Services (NGS) retailers increased in a downtown, so did the pandemic’s impact.</td>
</tr>
<tr>
<td>Transit</td>
<td>The pandemic significantly reduced transit ridership, and this impact had a ripple effect in transit-oriented downtowns.</td>
</tr>
<tr>
<td>Vacancy</td>
<td>The pandemic had a greater impact as downtown vacancy rates increased.</td>
</tr>

Diverse Downtowns | Morrisville Borough, NJ

For the 75 downtowns analyzed, each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted. The more diverse downtowns were generally less impacted by the pandemic.

Morrisville's downtown has a smaller but relatively diverse residential population, and it benefits from being connected to one of the region's existing Circuit Trails. However, the downtown is overly reliant on Neighborhood Goods & Services (NGS) retailers, has a high vacancy rate, and lacks the number of civic, cultural, and office uses that other downtowns have. These qualities are why Morrisville received a Diversity Score of 67, which indicates that the downtown is one of the least diverse in the region.

Morrisville's Diversity Score is reflected in the higher than average impact observed during the pandemic, and the downtown's Pandemic Impact Score of 60.
Downtown Typologies

Nine downtown typologies were identified and the average Pandemic Impact Score was determined for each: Brewery (45), Circuit (48), Classic (46), College (50), Core (43), Expanding (42), Historic (47), Opportunity (45), and Transit-Oriented (50).

In general, more typologies equated to a lower Pandemic Impact Score. Morrisville is considered to be one typology: Circuit.

Downtowns that are considered to be one typology had an average Pandemic Impact Score of 61.
A negative correlation between the estimated population of the region’s downtowns and the Pandemic Impact Score was identified. In other words, the larger the downtown population, the smaller the impact.

In 2019, the population in Morrisville was estimated to be 44, compared to the average of 165 for all downtowns and 326 for the least impacted downtowns.

Morrisville’s downtown population is relatively diverse with regards to demographics, with the Black, Hispanic, and White populations accounting for 15%, 12%, and 74% respectively.
Retail accounts for 61% of the uses in Morrisville, which is nearly equal to the averages of 57% for all downtowns and 60% for the least impacted downtowns.

In the least impacted downtowns, Food & Beverage (FB) and General Merchandise, Apparel, Furnishings & Other (GAFO) retailers account for larger shares at 30% and 38%, respectively. On average, as the share of each of these increased the Pandemic Impact Score decreased.

Conversely, in the least impacted downtowns, Neighborhood Goods & Services (NGS) retailers made up a much smaller share on average at 30%. As the share of NGS retailers or the vacancy rate increased, so did the Pandemic Impact Score. Morrisville has one of the highest vacancy rates in the region.
Visits to Downtown

Geolocated, deidentified cellphone location data was analyzed to determine the pandemic’s impact on visits to the region’s downtowns and their trade areas. Visits to Morrisville were as follows:

- **Pre-Pandemic**
  - Delaware: 0.0%
  - Maryland: 0.0%
  - New Jersey: 48.3%
  - New York: 0.0%
  - Pennsylvania: 51.7%

- **Shutdown | March 13 - June 15, 2020**
  - Delaware: 0.0%
  - Maryland: 0.0%
  - New Jersey: 44.3%
  - New York: 0.0%
  - Pennsylvania: 55.7%

- **Reopening | June 16 - October 31, 2020**
  - Delaware: 0.0%
  - Maryland: 0.0%
  - New Jersey: 53.1%
  - New York: 0.0%
  - Pennsylvania: 46.9%
Pre-pandemic, visitors to Morrisville came from lower Bucks, Mercer, Montgomery, and Philadelphia Counties, as well as throughout central New Jersey. During the pandemic, most visitors came from lower Bucks and Mercer Counties.

Between August 2018 and March 2020, 5,654 people visited the downtown, which was less than the average of 8,800 visits for all of the downtowns.

During the shutdown (March 13 - June 15) there were 278 visits, and during the reopening period (June 16 - October 31) there were 409 visits to Morrisville.
Shutdown Impact
March 13 - June 15, 2020

During the economic shutdown, there were 278 visits to Morrisville compared to 1,512 visits during the same period in 2019. This equated to an 82% reduction.

The average number of visits during the shutdown period was 439 compared to 2,450 visits during the same period in 2019, which equated to an average reduction of 81%.

Gloucester City’s downtown had the smallest reduction in visits at 66%, and the average for the least impacted downtowns was 81%.

Reopening Rebound
June 16 - October 31, 2020

Visits to Morrisville increased by 47% during the reopening period to a total of 409 visits. This was 80% fewer than the 2,061 visits that occurred during the same period in 2019.

On average, visits increased by 62% for all downtowns, to approximately 700 visits, and by 91% for the least impacted downtowns, to approximately 1,700 visits.

New Hope observed the greatest increase at 215%, with more than 2,800 visits during that time.

SOURCE: BUXTON CO.
Morrisville’s pre-pandemic trade area was a 27 minute drive time, which shrank by 11% during the shutdown to 24 minutes. However, during reopening, the trade area shrank by an additional 8% to 22 minutes. Morrisville was one of only five downtowns to see a further trade area reduction during reopening.

The average pre-pandemic trade area was 31 minutes, with a 23% reduction during the shutdown down to 24 minutes. The average recovery was 10% for all downtowns up to 27 minutes.

At 69 minutes, New Hope was the only downtown with a trade area that extended beyond an hour, and that was larger during reopening (72 minutes).
