

# Diverse Downtowns

75 of the region's downtowns were analyzed, and each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1–100, with one being the most diverse and least impacted.

This effort found that more diverse downtowns were generally less impacted by the economic shutdown related to the COVID-19 pandemic.

All 75 of the downtowns that were analyzed are listed, along with their Pandemic Impact Scores, in order from most to least diverse.

Disclaimer:  
This is an analysis of visits to and trade areas of the region's downtowns. However, it is not an economic impact analysis. Retail sales were not part of this body of work.

# Characteristics that **reduced** the pandemic's impact:

Downtowns with the following characteristics were generally less impacted by the pandemic than their peers.

## Development

Recent mixed-use, residential, and retail developments within the downtowns increased diversity as well as resiliency.

## Diversity

Downtowns with diverse built environments, demographics, local economies, mix of uses, and transportation options, were less impacted.

## People

Diverse and permanent residential populations located within the downtowns provided retailers with customers even as people stayed close to home.

## Trails

Existing Circuit Trails connected downtowns with open space and enabled alternative modes of transportation.

## Walkability

Historic downtowns with more pedestrian-friendly built environments had greater resiliency.

# Characteristics that **exacerbated** the pandemic's impact:

Downtowns that lacked the characteristics found to reduce the pandemic's impact, or that were more greatly defined by the following characteristics, were generally more impacted by the pandemic than their peers.

## Cars

Auto-oriented downtowns with lower Walk Scores and more cars per household were more impacted by the pandemic.

## Colleges

Downtowns that are overly-reliant on these anchor institutions were less resilient during the pandemic.

## Goods & Services

As the share of Neighborhood Goods & Services (NGS) retailers increased in a downtown, so did the pandemic's impact.

## Transit

The pandemic significantly reduced transit ridership, and this impact had a ripple effect in transit-oriented downtowns.

## Vacancy

The pandemic had a greater impact as downtown vacancy rates increased.

# Diverse Downtowns | Mount Holly Township, NJ

For the 75 downtowns analyzed, each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted. The more diverse downtowns were generally less impacted by the pandemic.

Mount Holly has a historic downtown with a robust and diverse residential population. It also has a relatively healthy mix of retail types, as well as a number of civic, cultural, and office uses. These qualities are why Mount Holly received a Diversity Score of 41, which indicates that the downtown is more diverse than the average downtown.

Although the downtown is relatively diverse, Mount Holly received a Pandemic Impact Score of 48, which is approximately average for the region.

41

## Diversity Score

*Built environment, mix of uses, population, transportation, and types of downtowns*

48

## Pandemic Impact Score

*Visits and trade area pre-pandemic, and during the shut-down and reopening periods*

# Downtown Typologies

Nine downtown typologies were identified and the average Pandemic Impact Score was determined for each: *Brewery* (45), *Circuit* (48), *Classic* (46), *College* (50), *Core* (43), *Expanding* (42), *Historic* (47), *Opportunity* (45), and *Transit-Oriented* (50).

In general, more typologies equated to a lower Pandemic Impact Score. Mount Holly is considered to be three typology: *Brewery*, *Circuit* (although the trail does not currently exist), and *Historic*. Downtowns that are considered to be three typologies had an average Pandemic Impact Score of 53.

It is worth noting that *Circuit* downtowns that have not yet built their trails had an average Pandemic Impact Score of 53, compared to a score of 48 for those that have existing Circuit Trails.

# Downtown Population

A negative correlation between the estimated population of the region’s downtowns and the Pandemic Impact Score was identified. In other words, the larger the downtown population, the smaller the impact.

In 2019, the population in Mount Holly was estimated to be 184, compared to the average of 165 for all downtowns and 326 for the least impacted downtowns.

Mount Holly’s downtown population is relatively diverse with regards to demographics, with the Black, Hispanic, and White populations accounting for 26%, 13%, and 61% respectively.

## Mix of Uses

Retail accounts for 40% of the uses in Mount Holly, which is one of the lowest shares in the region, and less than the averages of 57% for all downtowns and 60% for the least impacted downtowns.

In the least impacted downtowns, *Food & Beverage* (FB) retailers made up a slightly larger share at 30%, and *General Merchandise, Apparel, Furnishings & Other* (GAFO) retailers accounted for a smaller share at 38%. On average, as the share of each of these increased the Pandemic Impact Score decreased.

Conversely, in the least impacted downtowns, *Neighborhood Goods & Services* (NGS) retailers made up a larger share on average at 30%. As the share of NGS retailers or the vacancy rate increased, so did the Pandemic Impact Score.

Of note, Mount Holly is one of 15 downtowns with an *Experiential* (EXP) retailer.

## Visits to Downtown

Geolocated, deidentified cellphone location data was analyzed to determine the pandemic's impact on visits to the region's downtowns and their trade areas. Visits to Mount Holly were as follows:

### ● Pre-Pandemic

Delaware: 0.0%	New York: 0.0%
Maryland: 0.0%	Pennsylvania: 5.7%
New Jersey: 94.3%	

### ● Shutdown | March 13 - June 15, 2020

Delaware: 0.0%	New York: 0.0%
Maryland: 0.0%	Pennsylvania: 3.8%
New Jersey: 96.2%	

### ● Reopening | June 16 - October 31, 2020

Delaware: 0.0%	New York: 0.0%
Maryland: 0.0%	Pennsylvania: 3.6%
New Jersey: 96.4%

## Visits to Downtown

Pre-pandemic, visitors to Mount Holly came from throughout central and southern New Jersey, and somewhat from Bucks and Philadelphia Counties. During the pandemic, most visitors came from within Burlington County.

Between August 2018 and March 2020, 9,391 people visited the downtown, which was more than the average of 8,800 visits for all of the downtowns.

During the shutdown (March 13 - June 15) there were 477 visits, and during the reopening period (June 16 - October 31) there were 714 visits to Mount Holly.

# Shutdown Impact

March 13 - June 15, 2020

During the economic shutdown, there were 477 visits to Mount Holly compared to 2,500 visits during the same period in 2019. This equated to an 81% reduction, which was average for the region.

The average number of visits during the shutdown period was 439 compared to 2,450 visits during the same period in 2019, which equated to an average reduction of 81%.

Gloucester City's downtown had the smallest reduction in visits at 66%, and the average for the least impacted downtowns was 81%.

10 LEAST IMPACTED DOWNTOWNS

# Reopening Rebound

June 16 - October 31, 2020

Visits to Mount Holly increased by 50% during the reopening period to a total of 714 visits. This was 78% fewer than the 3,274 visits that occurred during the same period in 2019.

On average, visits increased by 62% for all downtowns, to approximately 700 visits, and by 91% for the least impacted downtowns, to approximately 1,700 visits.

New Hope observed the greatest increase at 215%, with more than 2,800 visits during that time.

SOURCE: BUXTON CO.

# Trade Area Recovery

(Drive Time in Minutes)

Mount Holly’s pre-pandemic trade area was a 32 minute drive time, and the trade area shrank by 22% during the shutdown to 25 minutes. During reopening, the trade area recovered by 6% to 27 minutes.

The average pre-pandemic trade area was 31 minutes, with a 23% reduction during the shutdown down to 24 minutes. The average recovery was 10% for all downtowns up to 27 minutes.

At 69 minutes, New Hope was the only downtown with a trade area that extended beyond an hour. It was also the only downtown to have a larger trade area during reopening (72 minutes) than it did pre-pandemic.
