Diverse Downtowns

75 of the region's downtowns were analyzed, and each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted.

This effort found that more diverse downtowns were generally less impacted by the economic shutdown related to the COVID-19 pandemic.

All 75 of the downtowns that were analyzed are listed, along with their Pandemic Impact Scores, in order from most to least diverse.

Disclaimer

This is an analysis of visits to and trade areas of the region's downtowns. However, it is not an economic impact analysis. Retail sales were not part of this body of work.

Characteristics that reduced the pandemic's impact:

Downtowns with the following characteristics were generally less impacted by the pandemic than their peers.

Development

Recent mixed-use, residential, and retail developments within the downtowns increased diversity as well as resiliency.

Diversity

Downtowns with diverse built environments, demographics, local economies, mix of uses, and transportation options, were less impacted.

People

Diverse and permanent residential populations located within the downtowns provided retailers with customers even as people stayed close to home.

Trails

Existing Circuit Trails connected downtowns with open space and enabled alternative modes of transportation.

Walkability

Historic downtowns with more pedestrian-friendly built environments had greater resiliency.

Characteristics that exacerbated the pandemic's impact:

Downtowns that lacked the characteristics found to reduce the pandemic's impact, or that were more greatly defined by the following characteristics, were generally more impacted by the pandemic than their peers.

Cars

Auto-oriented downtowns with lower Walk Scores and more cars per household were more impacted by the pandemic.

Colleges

Downtowns that are overly-reliant on these anchor institutions were less resilient during the pandemic.

Goods & Services

As the share of Neighborhood Goods & Services (NGS) retailers increased in a downtown, so did the pandemic's impact.

Transit

The pandemic significantly reduced transit ridership, and this impact had a ripple effect in transit-oriented downtowns.

Vacancy

The pandemic had a greater impact as downtown vacancy rates increased.

Diverse Downtowns | Pine Hill Borough, NJ

For the 75 downtowns analyzed, each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted. The more diverse downtowns were generally less impacted by the pandemic.

Pine Hill's downtown has a few civic and cultural uses, which help add to diversity. However, it lacks the residential population, walkability, and number retail and office uses that other downtowns have. These qualities are why Pine Hill received a Diversity Score of 63, which indicates that it is less diverse than most downtowns.

The downtown received a Pandemic Impact Score of 59, which indicates that the pandemic had a greater than average impact on Pine Hill's downtown.

Diversity Score

Built environment, mix of uses, population, transportation, and types of downtowns

Pandemic Impact Score

Visits and trade area prepandemic, and during the shutdown and reopening periods

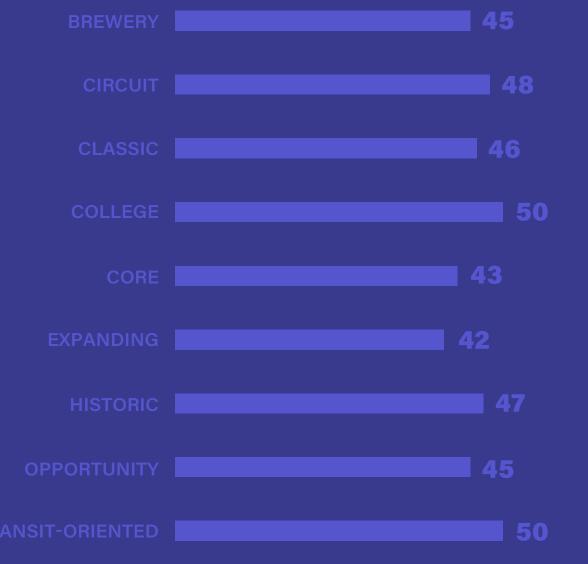

Downtown Typologies

Nine downtown typologies were identified and the average Pandemic Impact Score was determined for each: *Brewery (45), Circuit (48), Classic (46), College (50), Core (43), Expanding (42), Historic (47), Opportunity (45), and Transit-Oriented (50).*

In general, more typologies equated to a lower Pandemic Impact Score. Pine Hill, along with four other downtowns, was not considered to be any of the identified typologies.

Downtowns that were not considered to be one of these typologies had an average Pandemic Impact Score of 52.

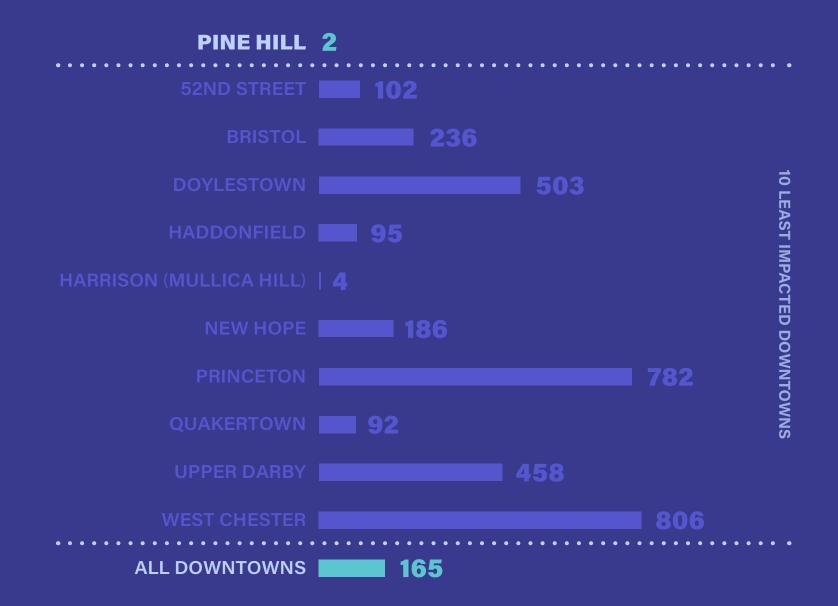

Downtown Population

A negative correlation between the estimated population of the region's downtowns and the Pandemic Impact Score was identified. In other words, the larger the downtown population, the smaller the impact.

In 2019, the population in Pine Hill's downtown was estimated to be 2, compared to the average of 165 for all downtowns and 326 for the least impacted downtowns.

Retail Mix:

44% Food & Beverage (FB)

19% General Merchandise, Apparel, Furnishings, & Other (GAFO)

Neighborhood Goods & Services (NGS)

6% Civic

3% Cultural

0% Institutional

3% Office

31% Residential

11% Vacancy

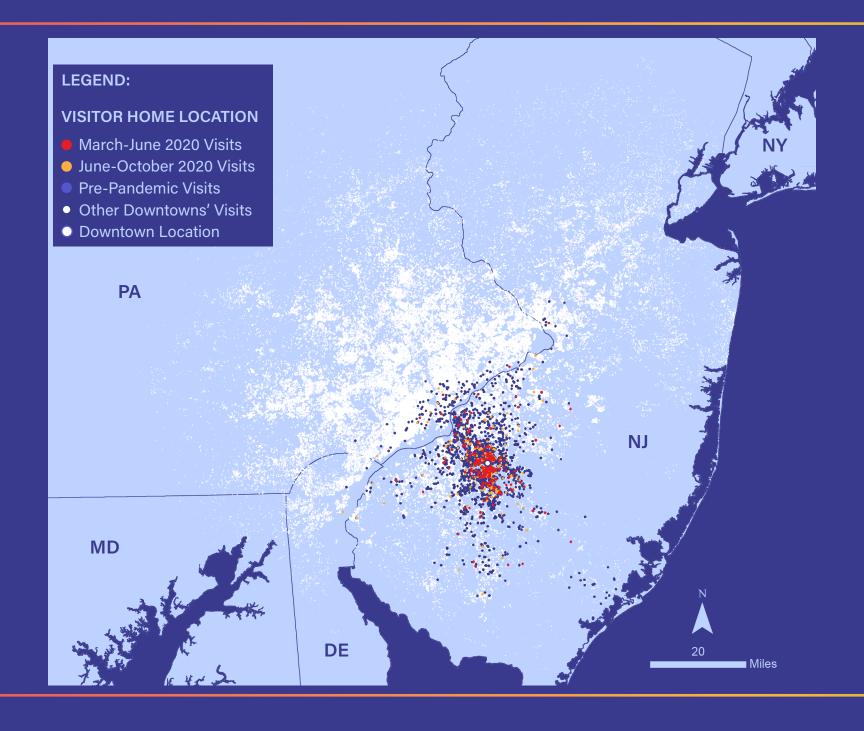

Mix of Uses

Retail accounts for 46% of the uses in Pine Hill. This is one of the lowest shares in the region, and it is significantly lower than the averages of 57% for all downtowns and 60% for the least impacted downtowns.

In the least impacted downtowns, *Food & Beverage* (FB) retailers made up a significantly smaller share at 30%, while *General Merchandise*, *Apparel*, *Furnishings & Other* (GAFO) retailers accounted for a much higher share at 38%. On average, as the share of each of these increased the Pandemic Impact Score decreased.

Conversely, Neighborhood Goods & Services (NGS) retailers made up a smaller share of 30% in the least impacted downtowns. In general, as the share of NGS retailers or the vacancy rate increased, so did the Pandemic Impact Score.

Visits to Downtown

Geolocated, deidentified cellphone location data was analyzed to determine the pandemic's impact on visits to the region's downtowns and their trade areas. Visits to Pine Hill were as follows:

Pre-Pandemic

Delaware: 0.0% New York: 0.0% Maryland: 0.0% Pennsylvania: 0.4% New Jersey: 94.6%

• Shutdown | March 13 - June 15, 2020

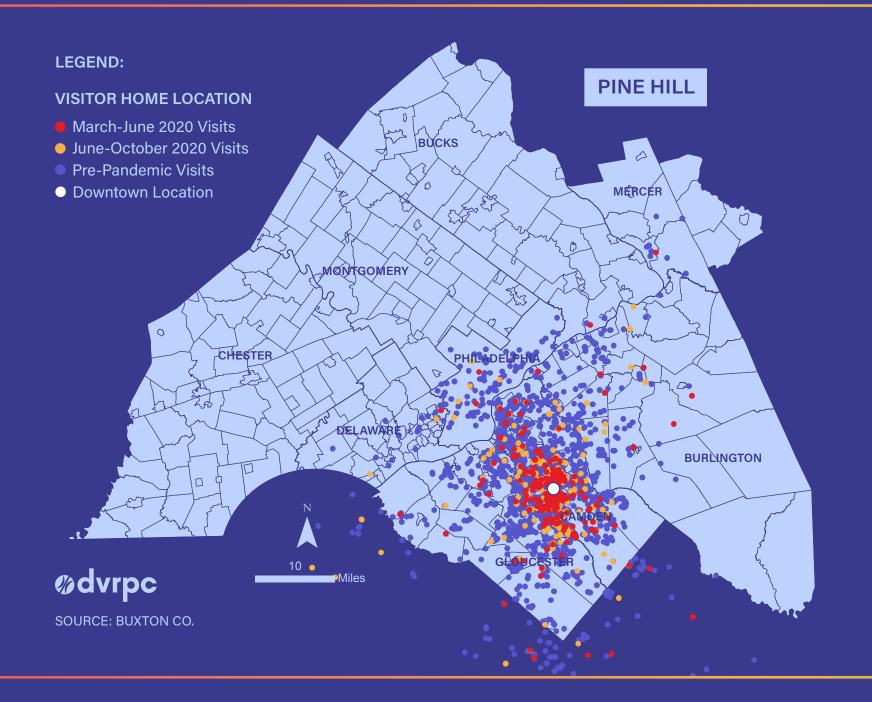

Delaware: 0.0% New York: 0.0% Maryland: 0.0% Pennsylvania: 1.4%

New Jersey: 98.6%

• Reopening | June 16 - October 31, 2020

Delaware: 0.3% New York: 0.0% Maryland: 0.0% Pennsylvania: 2.3% New Jersey: 97.4%

Visits to Downtown

Before the pandemic, visitors to Pine Hill primarily came from throughout Camden, Gloucester, and Philadelphia Counties. During the pandemic, visitors mostly came from nearby portions of Camden and Gloucester Counties.

Between August 2018 and March 2020, 4,213 people visited the downtown, which was significantly less than the average of 8,800 visits for all of the downtowns.

During the shutdown (March 13 - June 15) there were 338 visits, and during the reopening period (June 16 - October 31) there were 409 visits to Pine Hill.

Shutdown Impact

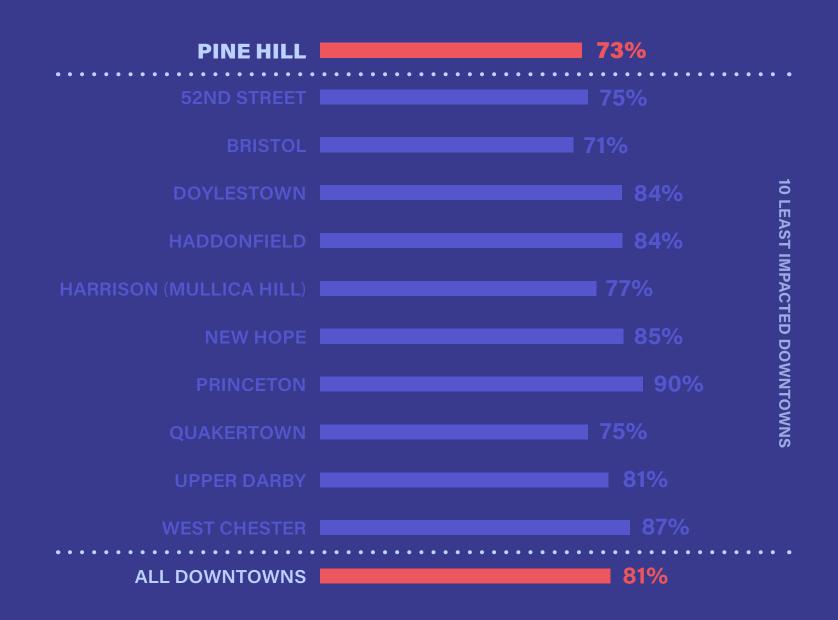

March 13 - June 15, 2020

During the economic shutdown, there were 338 visits to Pine Hill compared to 1,246 visits during the same period in 2019. This equated to a 73% reduction, which was relatively low compared to the other downtowns.

The average number of visits during the shutdown period was 439 compared to 2,450 visits during the same period in 2019, which equated to an average reduction of 81%.

Gloucester City's downtown had the smallest reduction in visits at 66%, and the average for the least impacted downtowns was 81%.

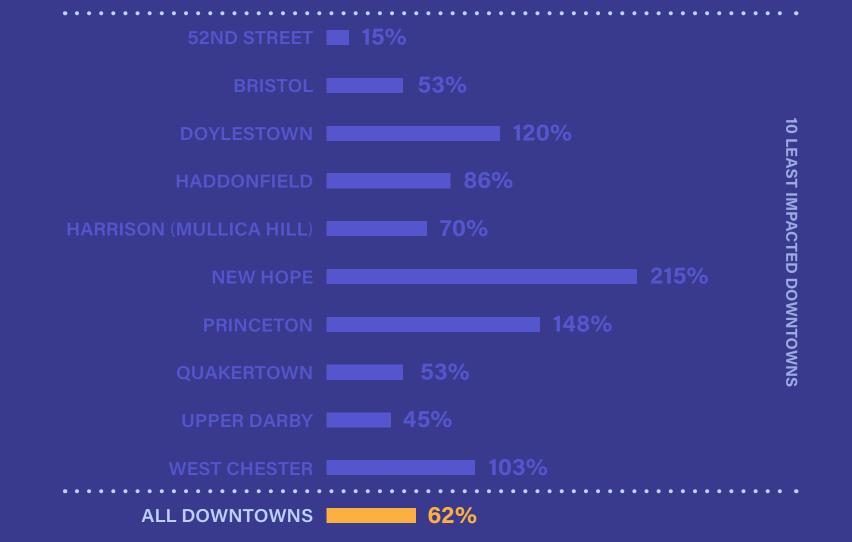

Reopening Rebound

June 16 - October 31, 2020

Visits to Pine Hill increased by 21% during the reopening period to a total of 409 visits. This was 74% fewer than the 1,545 visits that occurred during the same period in 2019.

On average, visits increased by 62% for all downtowns, to approximately 700 visits, and by 91% for the least impacted downtowns, to approximately 1,700 visits.

New Hope observed the greatest increase at 215%, with more than 2,800 visits during that time.

PINE HILL 21%

Trade Area Recovery

(Drive Time in Minutes)

Pine Hill's pre-pandemic trade area was a 23 minute drive time, and the trade area shrank by 26% during the shutdown to 17 minutes. During reopening, the trade area had a 4% recovery to 18 minutes.

The average pre-pandemic trade area was 31 minutes, with a 23% reduction during the shutdown down to 24 minutes. The average recovery was 10% for all downtowns up to 27 minutes.

At 69 minutes, New Hope was the only downtown with a trade area that extended beyond an hour. It was also the only downtown to have a larger trade area during reopening (72 minutes) than it did pre-pandemic.
