Diverse Downtowns

75 of the region’s downtowns were analyzed, and each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted.

This effort found that more diverse downtowns were generally less impacted by the economic shutdown related to the COVID-19 pandemic.

All 75 of the downtowns that were analyzed are listed, along with their Pandemic Impact Scores, in order from most to least diverse.

Disclaimer:
This is an analysis of visits to and trade areas of the region’s downtowns. However, it is not an economic impact analysis. Retail sales were not part of this body of work.
Characteristics that reduced the pandemic’s impact:

Downtowns with the following characteristics were generally less impacted by the pandemic than their peers.

**Development**
Recent mixed-use, residential, and retail developments within the downtowns increased diversity as well as resiliency.

**Diversity**
Downtowns with diverse built environments, demographics, local economies, mix of uses, and transportation options, were less impacted.

**People**
Diverse and permanent residential populations located within the downtowns provided retailers with customers even as people stayed close to home.

**Trails**
Existing Circuit Trails connected downtowns with open space and enabled alternative modes of transportation.

**Walkability**
Historic downtowns with more pedestrian-friendly built environments had greater resiliency.
Downtowns that lacked the characteristics found to reduce the pandemic’s impact, or that were more greatly defined by the following characteristics, were generally more impacted by the pandemic than their peers.

<table>
<thead>
<tr>
<th>Characteristics</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Cars</strong></td>
<td>Auto-oriented downtowns with lower Walk Scores and more cars per household were more impacted by the pandemic.</td>
</tr>
<tr>
<td><strong>Colleges</strong></td>
<td>Downtowns that are overly-reliant on these anchor institutions were less resilient during the pandemic.</td>
</tr>
<tr>
<td><strong>Goods &amp; Services</strong></td>
<td>As the share of Neighborhood Goods &amp; Services (NGS) retailers increased in a downtown, so did the pandemic’s impact.</td>
</tr>
<tr>
<td><strong>Transit</strong></td>
<td>The pandemic significantly reduced transit ridership, and this impact had a ripple effect in transit-oriented downtowns.</td>
</tr>
<tr>
<td><strong>Vacancy</strong></td>
<td>The pandemic had a greater impact as downtown vacancy rates increased.</td>
</tr>

Diverse Downtowns | Lansdale Borough, PA

For the 75 downtowns analyzed, each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted. The more diverse downtowns were generally less impacted by the pandemic.

Lansdale’s walkable downtown has a relatively diverse residential population, and a healthy mix of uses and types of retail. These qualities are why the downtown received a diversity score of 40, which indicates that the downtown is relatively diverse when compared to the region.

Despite these qualities, the pandemic had a typical impact on Lansdale with the downtown receiving a Pandemic Impact Score of 54. It is likely that the pandemic would have had a smaller impact if the recently completed mixed-use, transit-oriented development had been more established at the onset of the pandemic.
Downtown Typologies

Nine downtown typologies were identified and the average Pandemic Impact Score was determined for each: Brewery (45), Circuit (48), Classic (46), College (50), Core (43), Expanding (42), Historic (47), Opportunity (45), and Transit-Oriented (50).

In general, more typologies equated to a lower Pandemic Impact Score. Lansdale is considered to be five typologies: Brewery, Circuit, Classic, Expanding, and Transit-Oriented. Downtowns that are considered to be five typologies had an average Pandemic Impact Score of 42.

Although Lansdale is an Expanding downtown, its mixed-use development was not fully established at the onset of the pandemic. Impacts to SEPTA ridership most likely had a ripple effect in the downtown.
Downtown Population

A negative correlation between the estimated population of the region’s downtowns and the Pandemic Impact Score was identified. In other words, the larger the downtown population, the smaller the impact.

In 2019, Lansdale’s downtown population was estimated to be 79, which was approximately half of the average of 165 for all downtowns and four times less than the average of 326 for the least impacted downtowns. Although, this estimate is most likely low given recent development in the downtown.

Lansdale’s downtown population is relatively diverse with regards to demographics, with the White, Black, and Hispanic populations accounting for 73%, 7%, and 8% respectively.

SOURCE: BUXTON CO.
Retail accounts for 64% of the uses in Lansdale’s downtown, which is higher than both the average of 57% for all downtowns and 60% for the least impacted downtowns.

In the least impacted downtowns, Food & Beverage (FB) accounts for slightly less at 30% of all retail, and General Merchandise, Apparel, Furnishings, & Other (GAFO) made up a larger share of retail on average at 38%. As the shares of each of these retailers increased, the Pandemic Impact Score decreased.

Additionally, in the least impacted downtowns, Neighborhood Goods & Services (NGS) retailers made up a smaller share on average at 30%. On average, as the share of NGS retailers increased, so did the Pandemic Impact Score.
Visits to Downtown

Geolocated, deidentified cellphone location data was analyzed to determine the pandemic’s impact on visits to the region’s downtowns and their trade areas. Visits to Lansdale were as follows:

- **Pre-Pandemic**
  - Delaware: 0.0%
  - Maryland: 0.0%
  - New Jersey: 0.1%
  - New York: 0.0%
  - Pennsylvania: 99.9%

- **Shutdown | March 13 - June 15, 2020**
  - Delaware: 0.0%
  - Maryland: 0.0%
  - New Jersey: 0.0%
  - New York: 0.0%
  - Pennsylvania: 100%

- **Reopening | June 16 - October 31, 2020**
  - Delaware: 0.0%
  - Maryland: 0.0%
  - New Jersey: 0.4%
  - New York: 0.0%
  - Pennsylvania: 99.6%
Visits to Downtown

Pre-pandemic, visitors to Lansdale were primarily from Bucks, Montgomery, and Philadelphia Counties, as well as from outside of the region. However, during the pandemic, the majority of visits came from within Montgomery County.

Between August 2018 and March 2020, 9,088 people visited the downtown. This was slightly more than the average of 8,800 visits for all of the downtowns.

During the shutdown (March 13 - June 15) there were 361 visits, and during the reopening period (June 16 - October 31) there were 626 visits to Lansdale's downtown.
Shutdown Impact
March 13 - June 15, 2020

During the economic shutdown, there were 361 visits to Lansdale’s downtown compared to 2,390 visits during the same period in 2019. This equated to an 85% reduction.

The average number of visits during the shutdown period was 439 compared to 2,450 visits during the same period in 2019, which equated to an average reduction of 81%.

Gloucester City’s downtown had the smallest reduction in visits at 66%, and the average for the least impacted downtowns was 81%.

Reopening Rebound
June 16 - October 31, 2020

Visits to Lansdale’s downtown increased by 73% during the reopening period to a total of 626 visits. This was 80% fewer than the 3,190 visits that occurred during the same period in 2019.

On average, visits increased by 62% for all downtowns, to approximately 700 visits, and by 91% for the least impacted downtowns, to approximately 1,700 visits.

New Hope observed the greatest increase at 215%, with more than 2,800 visits during that time.

Trade Area Recovery
(Drive Time in Minutes)

Lansdale’s pre-pandemic trade area was a 35 minute drive time, which shrank by 26% during the shutdown to 26 minutes. During reopening, the trade area recovered by 6% to 28 minutes.

The average pre-pandemic trade area was 31 minutes, with a 23% reduction during the shutdown down to 24 minutes. The average recovery was 10% for all downtowns up to 27 minutes.

At 69 minutes, New Hope was the only downtown with a trade area that extended beyond an hour. It was also the only downtown to have a larger trade area during reopening (72 minutes) than it did pre-pandemic.
