

Diverse Downtowns

75 of the region's downtowns were analyzed, and each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1–100, with one being the most diverse and least impacted.

This effort found that more diverse downtowns were generally less impacted by the economic shutdown related to the COVID-19 pandemic.

All 75 of the downtowns that were analyzed are listed, along with their Pandemic Impact Scores, in order from most to least diverse.

Disclaimer:
This is an analysis of visits to and trade areas of the region's downtowns. However, it is not an economic impact analysis. Retail sales were not part of this body of work.

Characteristics that **reduced** the pandemic's impact:

Downtowns with the following characteristics were generally less impacted by the pandemic than their peers.

Development

Recent mixed-use, residential, and retail developments within the downtowns increased diversity as well as resiliency.

Diversity

Downtowns with diverse built environments, demographics, local economies, mix of uses, and transportation options, were less impacted.

People

Diverse and permanent residential populations located within the downtowns provided retailers with customers even as people stayed close to home.

Trails

Existing Circuit Trails connected downtowns with open space and enabled alternative modes of transportation.

Walkability

Historic downtowns with more pedestrian-friendly built environments had greater resiliency.

Characteristics that **exacerbated** the pandemic's impact:

Downtowns that lacked the characteristics found to reduce the pandemic's impact, or that were more greatly defined by the following characteristics, were generally more impacted by the pandemic than their peers.

Cars

Auto-oriented downtowns with lower Walk Scores and more cars per household were more impacted by the pandemic.

Colleges

Downtowns that are overly-reliant on these anchor institutions were less resilient during the pandemic.

Goods & Services

As the share of Neighborhood Goods & Services (NGS) retailers increased in a downtown, so did the pandemic's impact.

Transit

The pandemic significantly reduced transit ridership, and this impact had a ripple effect in transit-oriented downtowns.

Vacancy

The pandemic had a greater impact as downtown vacancy rates increased.

Diverse Downtowns | Riverton Borough, NJ

For the 75 downtowns analyzed, each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted. The more diverse downtowns were generally less impacted by the pandemic.

Riverton's downtown is one of the least walkable in the region. It also lacks a residential population, the number of retail uses, and the mix between chain and local retailers that other downtowns have. As a result, the downtown was determined to be one of the least diverse in the region and received a Diversity Score of 64.

These characteristics, as well as the pandemic's impact on Riverline ridership and competition from nearby Palmyra, most likely exacerbated the pandemic's impact and resulted in Riverton receiving a Pandemic Impact Score of 70. This was the sixth highest impact observed.

70

Pandemic Impact Score

Visits and trade area pre-pandemic, and during the shut-down and reopening periods

Downtown Typologies

Nine downtown typologies were identified and the average Pandemic Impact Score was determined for each: *Brewery* (45), *Circuit* (48), *Classic* (46), *College* (50), *Core* (43), *Expanding* (42), *Historic* (47), *Opportunity* (45), and *Transit-Oriented* (50).

In general, more typologies equated to a lower Pandemic Impact Score. Riverton is considered to be four typologies: *Circuit* (although the trail is not existing), *Classic*, *Historic*, and *Transit-Oriented*.

Downtowns that are considered to be four typologies had an average Pandemic Impact Score of 44. Riverton’s higher score may be in part due to impacts on Riverline ridership, as well as the fact that *Circuit* downtowns that have not yet built their trails had an average score of 53 compared to 48 for those with existing trails.

Downtown Population

A negative correlation between the estimated population of the region’s downtowns and the Pandemic Impact Score was identified. In other words, the larger the downtown population, the smaller the impact.

In 2019, Riverton’s downtown population was estimated to be 0, compared to an average of 165 for all downtowns and 326 for the least impacted downtowns.

10 LEAST IMPACTED DOWNTOWNS

Mix of Uses

Retail accounts for 42% of the uses in Riverton's downtown, which is one of the lowest shares observed. The average was 57% for all downtowns and 60% for the least impacted downtowns.

In the least impacted downtowns, *Food & Beverage (FB)* made up a slightly larger share of retail at 30%, while *General Merchandise, Apparel, Furnishings & Other (GAFO)* was slightly smaller in the least impacted downtowns at 38% of all retail. As the share of each of these increased, the average Pandemic Impact Score decreased.

Conversely, in the least impacted downtowns, *Neighborhood Goods & Services (NGS)* retailers made up 30% of all retail, which is slightly lower than Riverton.

In general, the greater the share of NGS retail or the higher the vacancy rate, the higher the Pandemic Impact Score.

Visits to Downtown

Geolocated, deidentified cellphone location data was analyzed to determine the pandemic's impact on visits to the region's downtowns and their trade areas. Visits to Riverton were as follows:

● Pre-Pandemic

Delaware: 0.0%	New York: 0.0%
Maryland: 0.0%	Pennsylvania: 13.4%
New Jersey: 86.6%	

● Shutdown | March 13 - June 15, 2020

Delaware: 0.0%	New York: 0.0%
Maryland: 0.0%	Pennsylvania: 8.0%
New Jersey: 92.0%	

● Reopening | June 16 - October 31, 2020

Delaware: 0.0%	New York: 0.0%
Maryland: 0.0%	Pennsylvania: 10.2%
New Jersey: 89.8%

Visits to Downtown

Pre-pandemic, visitors to Riverton primarily came from Burlington County, and to some degree from Camden and Philadelphia Counties. During the pandemic, the majority of visits came from nearby portions of Burlington County.

Between August 2018 and March 2020, 2,092 people visited the downtown, which is significantly less than the average of 8,800 visits for all of the downtowns.

During the shutdown (March 13 - June 15) there were 130 visits, and during the reopening period (June 16 - October 31) there were 146 visits to Riverton.

Shutdown Impact

March 13 - June 15, 2020

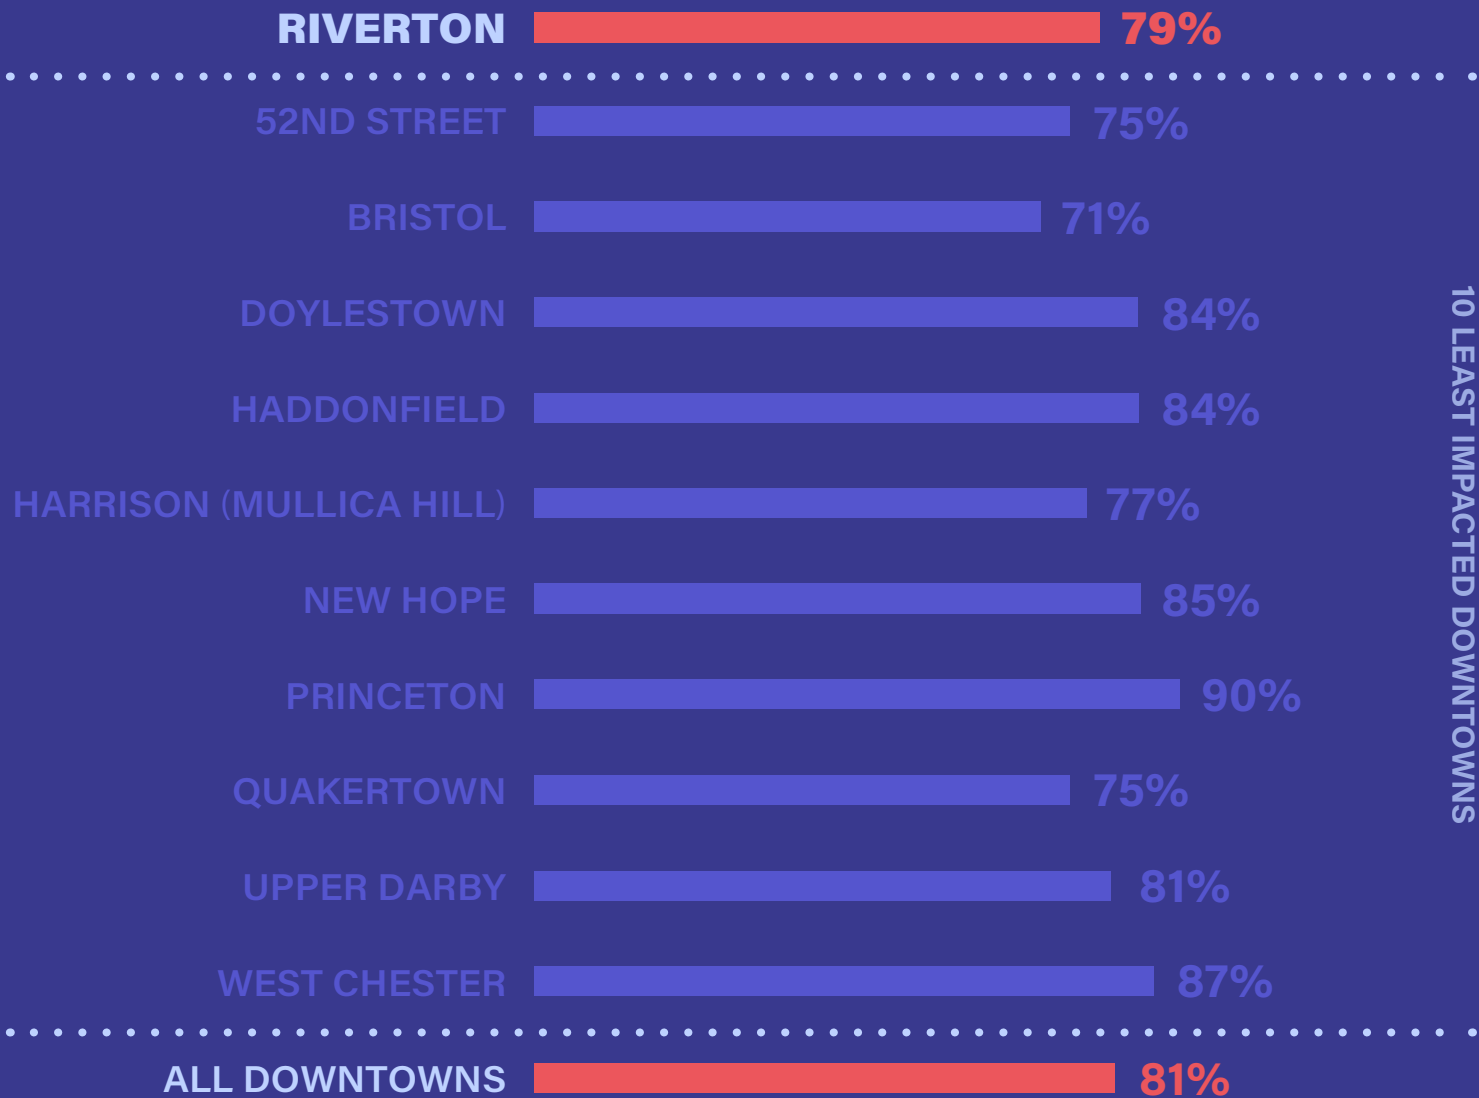

During the economic shutdown, there were 130 visits to Riverton’s downtown compared to 611 visits during the same period in 2019. This equated to a 79% reduction.

The average number of visits during the shutdown period was 439 compared to 2,450 visits during the same period in 2019, which equated to an average reduction of 81%.

Gloucester City’s downtown had the smallest reduction in visits at 66%, and the average for the least impacted downtowns was 81%.

10 LEAST IMPACTED DOWNTOWNS

Reopening Rebound

June 16 - October 31, 2020

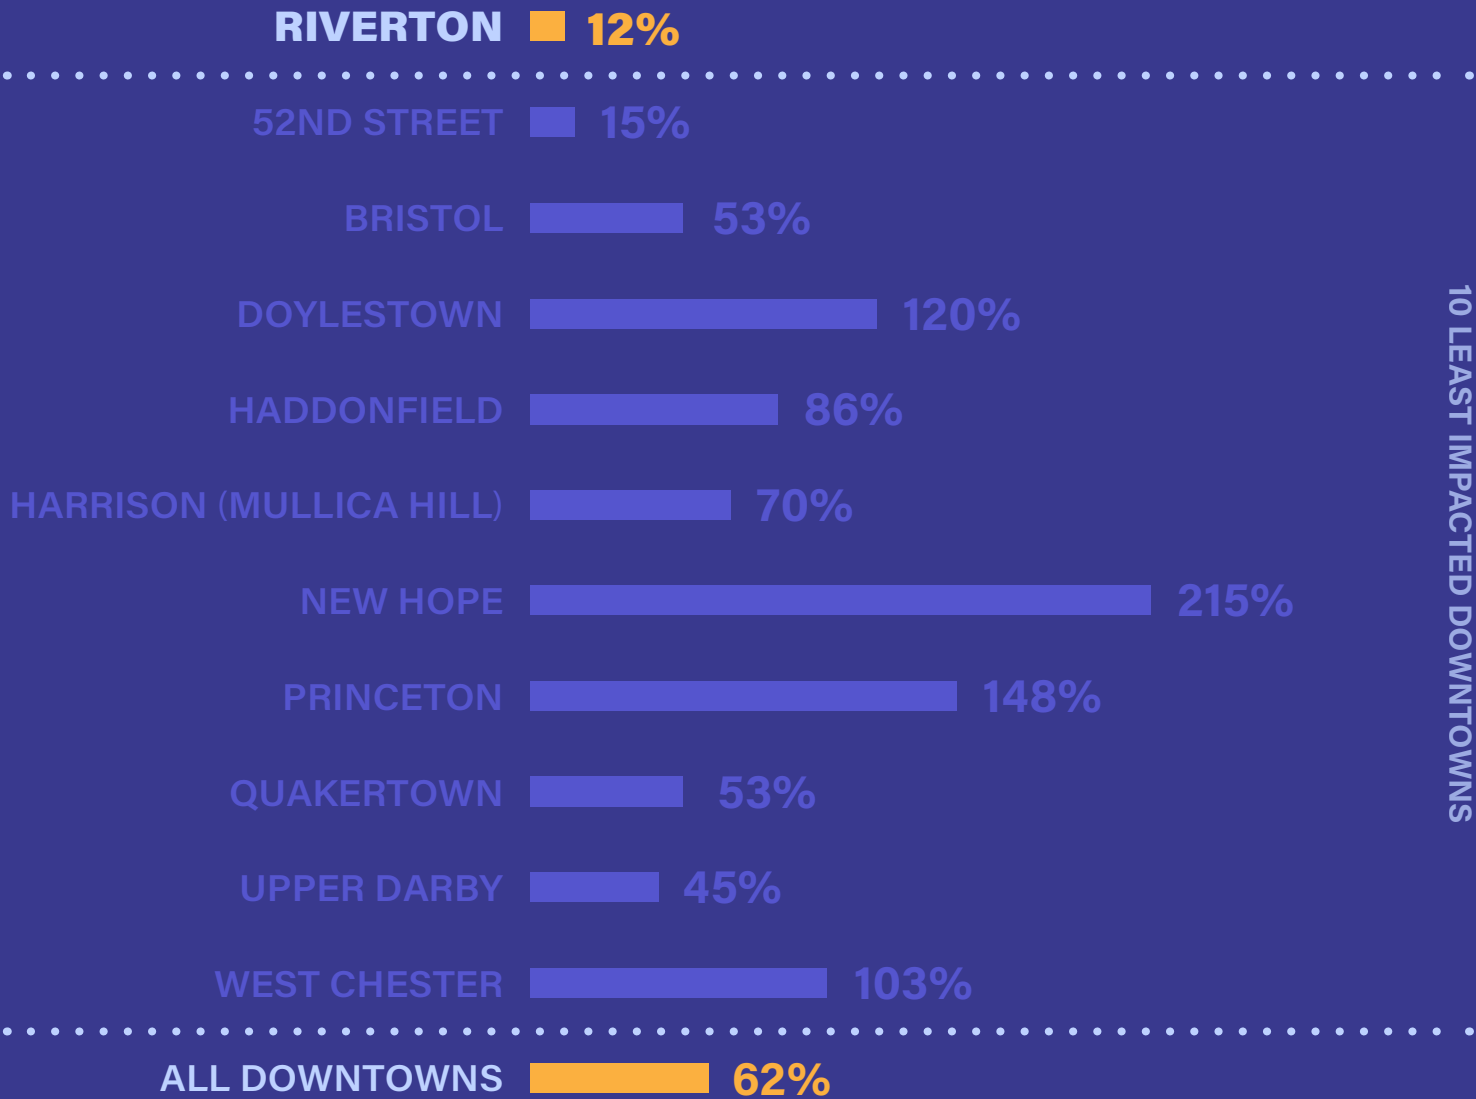

Visits to Riverton’s downtown increased by 12%, one of the lowest rebounds observed, during the reopening period to a total of 146 visits. This was 81% fewer than the 765 visits that occurred during the same period in 2019.

On average, visits increased by 62% for downtowns, to approximately 700 visits, and by 91% for the least impacted downtowns, to approximately 1,700 visits.

New Hope observed the greatest increase at 215%, with more than 2,800 visits during that time.

10 LEAST IMPACTED DOWNTOWNS

Trade Area Recovery

(Drive Time in Minutes)

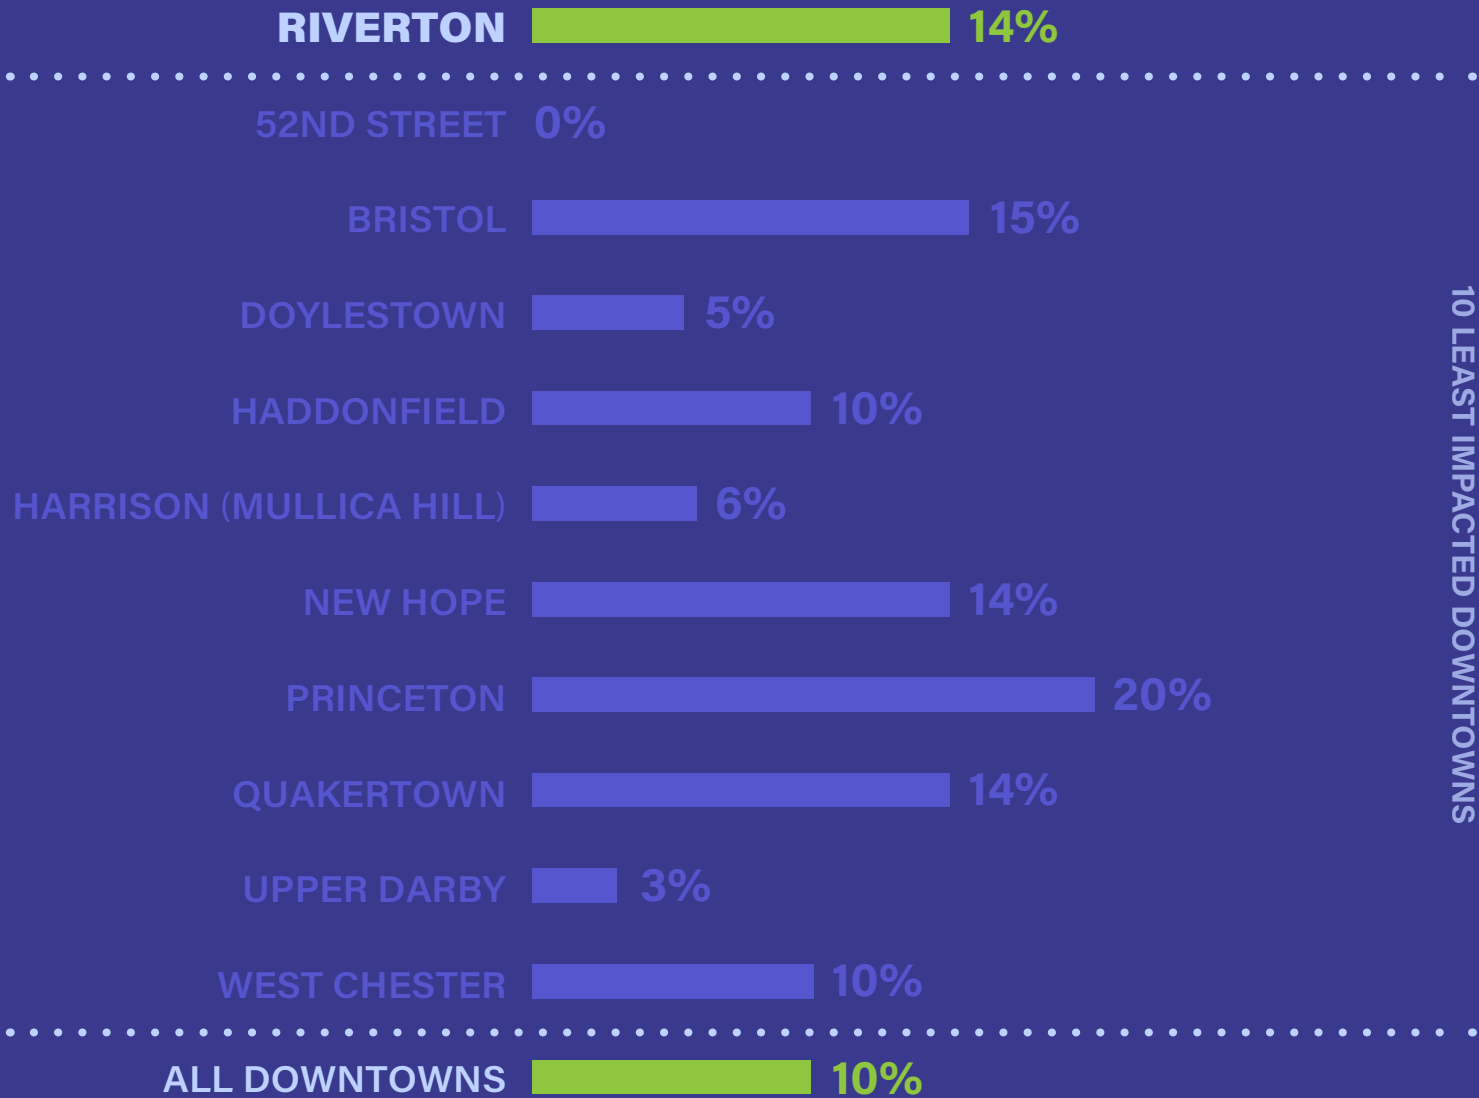

Riverton’s pre-pandemic trade area was a 28 minute drive time, which only shrank by 18% during the shutdown to 23 minutes. During reopening, the trade area recovered by 14% to 27 minutes.

The average pre-pandemic trade area was 31 minutes, with a 23% reduction during the shutdown down to 24 minutes. The average recovery was 10% for all downtowns up to 27 minutes.

At 69 minutes, New Hope was the only downtown with a trade area that extended beyond an hour, and that was larger during reopening (72 minutes).
