Diverse Downtowns

75 of the region’s downtowns were analyzed, and each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted.

This effort found that more diverse downtowns were generally less impacted by the economic shutdown related to the COVID-19 pandemic.

All 75 of the downtowns that were analyzed are listed, along with their Pandemic Impact Scores, in order from most to least diverse.

Disclaimer: This is an analysis of visits to and trade areas of the region’s downtowns. However, it is not an economic impact analysis. Retail sales were not part of this body of work.
Characteristics that reduced the pandemic’s impact:

Downtowns with the following characteristics were generally less impacted by the pandemic than their peers.

**Development**
Recent mixed-use, residential, and retail developments within the downtowns increased diversity as well as resiliency.

**Diversity**
Downtowns with diverse built environments, demographics, local economies, mix of uses, and transportation options, were less impacted.

**People**
Diverse and permanent residential populations located within the downtowns provided retailers with customers even as people stayed close to home.

**Trails**
Existing Circuit Trails connected downtowns with open space and enabled alternative modes of transportation.

**Walkability**
Historic downtowns with more pedestrian-friendly built environments had greater resiliency.
Characteristics that *exacerbated* the pandemic’s impact:

Downtowns that lacked the characteristics found to reduce the pandemic’s impact, or that were more greatly defined by the following characteristics, were generally more impacted by the pandemic than their peers.

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cars</td>
<td>Auto-oriented downtowns with lower Walk Scores and more cars per household were more impacted by the pandemic.</td>
</tr>
<tr>
<td>Colleges</td>
<td>Downtowns that are overly-reliant on these anchor institutions were less resilient during the pandemic.</td>
</tr>
<tr>
<td>Goods &amp; Services</td>
<td>As the share of Neighborhood Goods &amp; Services (NGS) retailers increased in a downtown, so did the pandemic’s impact.</td>
</tr>
<tr>
<td>Transit</td>
<td>The pandemic significantly reduced transit ridership, and this impact had a ripple effect in transit-oriented downtowns.</td>
</tr>
<tr>
<td>Vacancy</td>
<td>The pandemic had a greater impact as downtown vacancy rates increased.</td>
</tr>

Diverse Downtowns | East Lansdowne Borough, PA

For the 75 downtowns analyzed, each were assigned a Diversity Score and a Pandemic Impact Score on scales of 1—100, with one being the most diverse and least impacted. The more diverse downtowns were generally less impacted by the pandemic.

East Lansdowne’s downtown is somewhat walkable, and it has a healthy share of Food & Beverage (FB) retailers. However, it does not have a permanent residential population. It also lacks the number of civic, cultural, and office uses that other downtowns have, and retail accounts for a significant share of uses. These characteristics are why the downtown earned a Diversity Score of 73, which indicates that it is one of the least diverse downtowns in the region.

The downtown’s lack of diversity most likely exacerbated the pandemic’s impact, and at 60, East Lansdowne had one of the highest Pandemic Impact Scores.
Nine downtown typologies were identified and the average Pandemic Impact Score was determined for each: Brewery (45), Circuit (48), Classic (46), College (50), Core (43), Expanding (42), Historic (47), Opportunity (45), and Transit-Oriented (50).

In general, more typologies equated to a lower Pandemic Impact Score. East Lansdowne is considered to be two typologies: Circuit (although the trail has not yet been built) and Transit-Oriented. On average, downtowns that are two typologies had a Pandemic Impact Score of 52.

It is important to note that Circuit downtowns that have not yet built their trails had an average score of 53 compared to 48 for those that have an existing trail, and Transit-Oriented downtowns were some of the most impacted.
Downtown Population

A negative correlation between the estimated population of the region's downtowns and the Pandemic Impact Score was identified. In other words, the larger the downtown population, the smaller the impact.

In 2019, the population of East Lansdowne's downtown was estimated to be 0, compared to the averages of 165 for all downtowns and 326 for the least impacted downtowns.
Retail accounts for 83% of the uses in East Lansdowne's downtown, which is one of the highest shares observed, much higher than the average of 57% for all downtowns and 60% for the least impacted downtowns.

In the least impacted downtowns, Food & Beverage (FB) retailers made up a slightly smaller share at 30%, while General Merchandise, Apparel, Furnishings & Other (GAFO) retailers made up a much larger share at 38%. In general, as the share of each of these increased, the Pandemic Impact Score decreased.

Conversely, Neighborhood Goods & Services (NGS) retailers made up a much smaller share in the least impacted downtowns at 30%. On average, as the share of NGS retailers or a downtown's vacancy rate increased, so did the Pandemic Impact Score.
Geolocated, deidentified cellphone location data was analyzed to determine the pandemic’s impact on visits to the region’s downtowns and their trade areas. Visits to East Lansdowne were as follows:

- **Pre-Pandemic**
  - Delaware: 1.2%
  - Maryland: 0.0%
  - New Jersey: 1.8%
  - New York: 0.0%
  - Pennsylvania: 97.0%

- **Shutdown | March 13 - June 15, 2020**
  - Delaware: 0.5%
  - Maryland: 0.0%
  - New Jersey: 1.4%
  - New York: 0.0%
  - Pennsylvania: 98.1%

- **Reopening | June 16 - October 31, 2020**
  - Delaware: 1.1%
  - Maryland: 0.0%
  - New Jersey: 1.3%
  - New York: 0.0%
  - Pennsylvania: 97.8%
Pre-pandemic, visitors to East Lansdowne’s downtown primarily came from Delaware and Philadelphia Counties. During the pandemic, the majority of visits came from nearby portions of Delaware County.

Between August 2018 and March 2020, 6,102 people visited the downtown. This was less than the average of 8,800 for all of the downtowns. During the shutdown (March 13 - June 15) there were 395 visits, and during the reopening period (June 16 - October 31) there were 509 visits to East Lansdowne’s downtown.
During the economic shutdown, there were 395 visits to East Lansdowne compared to 1,860 visits during the same period in 2019. This equated to a 79% reduction.

The average number of visits during the shutdown period was 439 compared to 2,450 visits during the same period in 2019, which equated to an average reduction of 81%.

Gloucester City’s downtown had the smallest reduction in visits at 66%, and the average for the least impacted downtowns was 81%.

SOURCE: BUXTON CO.
Visits to East Lansdowne increased by 29% during the reopening period to a total of 509 visits, which was 75% fewer than the 2,051 visits that occurred during the same period in 2019.

On average, visits increased by 62% for all downtowns, to approximately 700 visits, and by 91% for the least impacted downtowns, to approximately 1,700 visits.

New Hope observed the greatest increase at 215%, with more than 2,800 visits during that time.

Trade Area Recovery  
(Drive Time in Minutes)

East Lansdowne’s pre-pandemic trade area was 28 minutes, which shrank by 25% during the shutdown to 21 minutes and did not recover during the reopening period.

The average pre-pandemic trade area was 31 minutes, with a 23% reduction during the shutdown down to 24 minutes. The average recovery was 10% to 27 minutes.

At 69 minutes, New Hope was the only downtown with a trade area that extended beyond an hour. It was also the only downtown to have a larger trade area during reopening (72 minutes) than it did pre-pandemic.
